XVUE® FACE MATCHING FOR CASINOS

Elevate Security, VIP Experience & Operational Intelligence

The New Standard in Casino Intelligence

Casinos are under increasing pressure to protect assets, deliver high-touch guest experiences and stay ahead of fraud — all while optimizing staff and surveillance resources. XVUE® by NetX delivers a cloud-based facial recognition solution purpose-built for gaming environments.

With real-time alerts, best-in-class accuracy and compatibility with existing cameras, XVUE® helps casinos identify threats, recognize high-value players and streamline operations — all from a single platform.

Key Value Pillars for Casinos

1) Security & Surveillance

- Instantly detect banned patrons, card counters & known fraud actors
- Real-time alerts sent to surveillance, security or floor operations
- Accelerates response time to incidents and reduces liability
- Supports existing RTSP cameras, webcams & mobile devices
- Proven to reduce theft and fraudulent activity in live gaming settings
- Automate offline forensic searches

2) VIP & Guest Experience

- Automatically identify high rollers upon entry
- Trigger host notifications for white-glove service
- Strengthen loyalty and repeat spend through personalization
- Integrates with CRM/loyalty platforms

3) Operational Efficiency & Compliance

- Cloud-native: no onsite servers or complex maintenance
- Scales across districts, campuses and multi-building environments
- Secure MFA access and privacy-conscious data handling
- Supports FERPA-compliant security practices through MFA, data access controls and restricted identity handling
