

XVUE® FACE MATCHING FOR CORRECTIONS & DETENTION FACILITIES

Enhance Facility Security, Inmate Monitoring & Staff Safety with Real-Time Identity Intelligence

Modern Identity Assurance for Secure Correctional Environments

Correctional facilities face constant challenges around inmate management, contraband control, unauthorized access, and staff safety. Maintaining full visibility and control across secure environments is critical.

XVUE® by NetX delivers a cloud-based facial recognition solution that strengthens facility security, improves monitoring, and enhances operational awareness—without disrupting daily procedures.

Key Benefits for Correction Facilities

1) Inmate & Staff Safety

- Identify inmates, persons of concern, or banned individuals
- Monitor housing units, corridors, and common areas
- Enable real-time alerts to security personnel
- Support rapid response to incidents

2) Access & Movement Control

- Verify staff, visitors, and contractors
- Control access to restricted and secure zones
- Monitor inmate movement across facility areas
- Integrate with cameras, VMS, and control system

3) Incident Prevention & Investigations

- Detect repeat offenders or suspicious behavior
- Improve situational awareness across the facility
- Search past video to identify individuals after incidents
- Accelerate investigations and reporting

Designed for Correctional Environments

- Jails & Detention Centers
- State & Federal Prisons
- Holding & Processing Facilities
- Juvenile Detention Centers
