

# XVUE® FACE MATCHING FOR WAREHOUSES & DISTRIBUTION CENTER

Protect Inventory, Staff & Operations with Real-Time Identity Intelligence

## Modern Identity Assurance for Secure Industrial Environments

Warehouses, fulfillment centers, and distribution hubs face increasing risks—from unauthorized access and cargo theft to workplace safety incidents and compliance pressures. XVUE® by NetX delivers a cloud-based facial recognition solution designed to strengthen physical security, reduce shrinkage, and improve operational visibility across industrial facilities.

With real-time alerts, high-accuracy recognition, and seamless integration with existing camera and access systems, XVUE® helps warehouse operators detect risks early, control access, and maintain safer, more secure operations—without disrupting workflow.

## Key Benefits

### 1) Facility & Workforce Protection

- Detect banned, terminated, or high-risk individuals
- Reduce theft, vandalism, and internal shrinkage risks
- Monitor loading docks, entrances, yards, and restricted zones
- Deliver instant alerts to security and operations teams
- Perform rapid forensic searches during investigations or audits

### 2) Access & Contractor Management

- Identify employees, contractors, vendors, and drivers at entry points
- Prevent unauthorized access to high-value or hazardous areas (inventory cages, bonded storage, control rooms)
- Integrate with existing RTSP cameras, gate systems, and control rooms
- Search previously recorded video and past events to identify individuals after incidents occur
- Support controlled access for multi-shift and high-turnover environments

### 3) Security, Privacy & Operational Compliance

- Designed with enterprise-grade security controls
- MFA-secured user access with full audit trails
- Encrypted facial templates—no raw biometric images stored
- Supports safety, labor, and loss-prevention compliance requirements
