

XVUE® FACE MATCHING FOR CORPORATE & OFFICE ENVIRONMENTS

Protect Employees, Visitors & Facilities with Real-Time Identity Intelligence

Modern Identity Assurance for Secure Corporate Environments

Corporate offices, campuses, and commercial buildings face increasing risks—from unauthorized access and workplace incidents to insider threats and compliance requirements.

XVUE® by NetX delivers a cloud-based facial recognition solution that enhances workplace security, strengthens access control, and improves real-time visibility—without disrupting daily operations.

Key Benefits for Corporate Organizations

1) Employee & Workplace Safety

- Detect banned or unauthorized individuals
- Monitor entrances, lobbies, and common areas
- Enable real-time alerts to security teams
- Support rapid response to incidents

2) Access & Identity Management

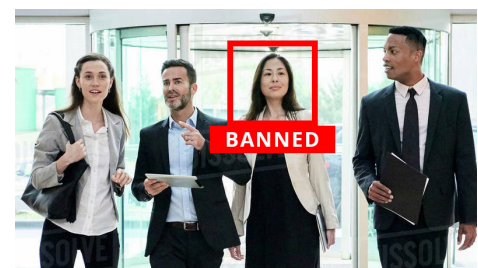

- Verify employees, visitors, and contractors
- Control access to restricted areas and offices
- Integrate with cameras, VMS, and access systems
- Support multi-site and campus environments

3) Incident Prevention & Awareness

- Identify repeat or flagged individuals
- Improve situational awareness across facilities
- Search past video to identify individuals after incidents
- Accelerate investigations and reporting

Designed for Corporate Environments

- Office Buildings & Corporate Headquarters
- Business Campuses
- Financial Institutions
- Technology & Data Centers
