

XVUE® FACE MATCHING FOR HOSPITALITY

Protect Guests, Staff & Facilities with Real-Time Identity Intelligence

Modern Identity Assurance for Safer Hospitality Environments

Hotels, resorts, casinos, and entertainment venues must balance exceptional guest experiences with strong security. From managing high guest turnover to identifying individuals of concern, hospitality environments require discreet, real-time awareness.

XVUE® by NetX delivers a cloud-based facial recognition solution designed to enhance guest safety, protect staff, and maintain secure, welcoming environments—without disrupting operations.

Key Benefits

1) Guest & Staff Safety

- Detect banned or high-risk individuals
- Monitor entrances and public areas
- Enable real-time security alerts
- Support rapid incident response

2) Access & Identity Management

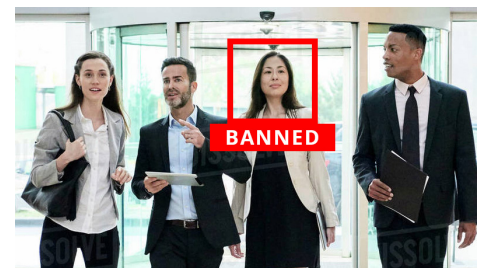

- Verify guests, staff, and vendors
- Control access to restricted areas
- Integrate with cameras and VMS
- Support multi-property operations

3) Incident Prevention & Awareness

- Identify repeat offenders
- Improve situational awareness
- Search past video to identify individuals after incidents
- Speed up investigations

Designed for Hospitality Environments

- Hotels & Resorts
- Casinos & Gaming Facilities
- Event Venues & Convention Centers
- Entertainment Complexes
